

Transitioning from Hospital to Community Research Symposium Agenda

A full-day symposium focused on improving early healthcare transitions for parents from neonatal follow-up clinics or acute care (e.g. Complex Care Kids Ontario) to children's treatment centres. The day is designed to: 1) engage attendees across the span of lived experiences including families, health care providers and researchers; 2) present the most up to date research and heighten awareness; and 3) collaborate to co-develop priorities and research questions to improve transitions across Ontario.
