Are you a Bloorview client who is 8-18 years old? Are you doing Lokomat training? Consider participating in our study.

What is this study about:
- This study is one way we are finding out what being involved in appointments means to clients and families.
- Our goal is to make appointments at Holland Bloorview the best they can be!
- You're invited to participate because you can tell us how we can make the questions we ask clients about their experiences at their appointments the best they can be!

Who can participate?
We are looking for Holland Bloorview clients who . . .
- Are 8-18 years old
- Are receiving Lokomat training

What's involved?
This study runs till December 31, 2020 and involves you answering questions. The questions will be a way for you to rate your experiences in your Lokomat training. These rating questions would be done for 2 appointments about 3-14 days apart (but we will aim for 3-7 days apart). Then, we would like you to answer some questions about what you thought about your involvement in your Lokomat training overall. We think it will take you about 5-10 minutes to answer the rating questions and 15 minutes to answer the final involvement questions. Your service providers will not know what you have said. You do not have to do this study if you don't want to. Whatever you decide won't change what you are doing in the Lokomat study you are in.

What are the benefits of participating?
- Not much is known about what clients and families think about their involvement in their visits, so you can help us learn more so that we can share that with other researchers and families!

You will receive a $25 giftcard for your participation.
