

# Participate in Research

**STUDY TO EVALUATE AND EXPLORE SCALES FOR REPETITIVE AND RESTRICTED BEHAVIORS AND DIGITAL BIOMARKERS IN CHILDREN, ADOLESCENTS, AND ADULTS WITH AUTISM SPECTRUM DISORDER (ASD)**

**Principal Investigator: Evdokia Anagnostou**

**Autism Research Centre**

**Are you interested in science and research? Do you want to help scientists understand Autism and repetitive behaviours?**

## **What is this study about?**

We are collecting information to discover which set of measures best captures restrictive and repetitive behaviors in people with autism. We also need to recruit typically developing children to participate in the study as controls.

## **Who can participate?**

We are looking for participants:

- Diagnosed with ASD between the ages of 5 and 45 **OR**
- not diagnosed with a developmental, psychiatric or neurological disorder between the ages of 5 and 12 **and** have no 1<sup>st</sup> degree relative with ASD

## **What's involved?**

We are asking participants to:

- complete some assessments
- complete some questionnaires (ASD only)
- complete brief daily tasks and games via study smartphone app

In addition, you will be provided with a wrist-worn wearable that tracks health-related signals every day.

## **What are the benefits of participating?**

- Participants will receive a gift certificate per each in-person study visit
- Your involvement may help improve the tests and scales used for individuals with autism in the future
