

Holland Bloorview Clinical BCI Program

1. Intake call

Our team lead will contact you for an intake call. They'll explain how the BCI technology works, what it can (and cannot) do, and how you or your child may benefit.

2. Initial assessment

After the intake call, you can schedule an assessment with our occupational therapist (OT) to try out a BCI and see if the program is a good fit.

3. BCI sessions

After the assessment, you can work with the OT to set goals. Depending on these goals, you may continue to work with the OT, join a therapeutic recreation group, or access our home loan program. You can also participate in any combination of these programs.
